

Y-Intercept Form

Name: _____ #12

Rewrite each equation in y- form: Then identify the **y-intercept** and the **slope**.

1) $-5x + 7y = 13$	2) $-5x + y = -6$	3) $3x - y = 15$
4) $-5y - 3x = -53$	5) $-5x + 7y = -51$	6) $y - 5x = -50$
7) $5y - 5x = 10$	8) $10 - 3x = -5y$	9) $8 - 5x = -8y$
10) $10 + -5y = 3x$	11) $-50 - 5y = 3x$	12) $30 - 5y = -5x$
